ABOUT ME

I am a 8th semester student who is passionate about multimedia and gaming. I am interested in creating engaging visual and interactive experiences through graphic design, animation, and game development. I am interested in taking this opportunity to contribute to this company. With my educational background and work experience, I am confident that I can contribute and assist this company in the practical skills needed in the working world. My educational background includes a Bachelor's degree in Vocational Education with a specialization in (Multimedia and Game Technology). I have a deep passion for learning the theory and practice of this field, and combining the two to create engaging multimedia experiences. I believe that with a strong understanding of multimedia and gaming techniques, I can contribute significantly and deliver innovative and engaging developments.
